Dawn,

I confirmed for her when she reached me that we were still reviewing the permit. We are still evaluating the comments received and will not have a projected timeline until we have sorted all of the comments.

For your information/use: we received over 40,000 comments. We have to review and bin the comments to determine how many discrete comments we received. We will then need to consider the comments and any relevant new information we may have received before we can determine the next steps on the permit.

Thanks  
jeaneanne

**Subject:** ACTION: IntraFish Media inquiry - Sims' Velella Epsilon project

Rachel Sapin, w/ IntraFish Media, would like to know where EPA is with permitting Neil Sims' Velella Epsilon project in Florida? <https://www.eenews.net/stories/1062193609>. She would also like to know if there a timeline for when EPA has to approve the permit?

Thanks,  
Dawn
